

Recursive Art reflection

This project was good at demonstrating there are some things that are easy to do with recursion that are very difficult to do with loops. I would consider this project to be a success because I now understand recursion enough to naturally use it for some basic functions. The project was appropriately scoped but I wish I was able to spend more time on the going beyond challenges. I did not feel the random nature of this project made it difficult to perform meaningful unit tests. Going forward I plan to use recursion to make my code more data driven. It took me a while to determine where I needed use recursion.
